

Acceptance Letter ConteAcademic Progress Reports – PhD in Medical Sciencesnt

King's College London

Faculty of Life Sciences & Medicine

Date: 10 MAY 2026

Report 1: Orientation and Research Planning

At the beginning of the program, Reem focuses on defining the general scope of her research topic under the guidance of her academic supervisor. This stage includes conducting an initial literature review, identifying a clear research problem, and formulating preliminary research questions and hypotheses. She also develops a structured timeline and outlines the proposed methodology. The report evaluates the clarity, feasibility, and academic relevance of the proposed research direction.

**Sincerely,
